## 25 Million Hancock Test Site

WASHINGTON — Sen. John C. Stennis said Tuesday the National Aeronautics and Space Administration is allocating about \$25,000,000 to begin immediate construction of the Mississippi test site in South Mississippi.

Stennis, a member of the Senate space committee who played a part in locating the big missile development in Hancock and Pearl River Counties, said the funds have been shifted from other "less urgent projects" and reprogrammed for immediate use in Mississippi.

Stennis said part of the funds was earmarked by Congress for the Mississippi test facilities last year, but most of the money has been programmed from other less urgent projects.

Stennis said the change in plans came because of the dire need to have the Mississippi facilities ready by February 1965. That is the target date when testing will begin for the acceptance of the Saturn S-2 rocket," Stennis said.

Stennis said the major part of the funds will be spent for construction of two test stands with accompanying control support buildings. Other items included will be site development, utilities, waterway extension, canal construction, grading, foundations and engineering. About \$7,720,000 of the total will go for equipment, instrumentation, support systems and propellant transportation systems.

In addition to the \$17,328,000 allocated Tuesday Stennis said NASA allocated another \$7,000,000 a few weeks ago for the construction of an earth dam and reservoir and other buildings in the site.

## Discuss Courthouse Problem

The Bay St. Louis Jaycee Community Development Committee headed by chairman Tom O. Logue, sponsored a public meeting Monday night at the courthouse to discuss the possible renovation of the present courthouse or building a new one.

Sheriff Gerald Price and Tax Assessor George Heitzmann told of the present cramped conditions, and of the need of repairs to the courthouse at the present time.

Fred Wagner, architect, gave a rough estimate of the cost to repair just a part of the bottom floor offices and the addition of some restrooms. Three years ago the estimate was given at \$150,000.

Mr. Wagner said he had just returned from Franklinton, La., and had visited a courthouse completed a year ago at a cost of \$450,000. This amount excluded the jail and cost of the land on which it was located.

Based on Mr. Wagner's estimates, one citizen was of the opinion it would cost as much to completely renovate as it would cost to build a new one.

A number of other citizens voiced their opinions on what should be done and how it may be achieved.

Some of the suggestions were annexing the courthouse on property located on Court Street. Acquiring additional property East or West of the courthouse for additions to the courthouse or for more parking space.

Building additions on all sides of the present courthouse, except the front, out to about 20 feet from the present streets and making horizontal parking places with the 20 additional feet.

It was also suggested that all employees park away from the area to provide more parking space for the public. Another suggestion was that Main Street be made one-way, running East and Court Street running West, with Gex and Cue Street running one-way correspondingly to enable traffic to slow clockwise around the courthouse.

Events of the evening were recorded and will be presented to the Board of Supervisors.

## HOLY NAME SUNDAY

Our Lady of the Gulf Holy Name Society will receive Holy Communion at 7 a. m. Mass Sunday, February 10.

## U. S. MARSHAL PETERSON ASSIGNED TO BILOXI AREA

U. S. Deputy Marshal Sam Peterson has been assigned to the Biloxi Division of U. S. District Court for the Southern District of Mississippi, according to an announcement this week by U. S. Marshal Jack Stuart.

A native of Bay St. Louis, Peterson served for five years with Metropolitan Police Department of Washington, D. C. Prior to going

According to unofficial returns from 20 of the 25 precincts Hancock County voters, Tuesday gave 449 votes for reapportionment of the State Legislature and 70 against.

Gulf Coast Counties voted favorably for reapportionment. Harrison County, with unofficial returns in from 44 of the 48 precincts, had given reapportionment a vote of 6,455 to 735.

Unofficial returns from all 45 of the Jackson County precincts listed a vote of 3,591 to 355.

Stone County, with all 10 precincts reporting, gave reapportionment a vote of 365 to 252 unofficially for a margin of about 2 to 1.

Returns were available from 20 of the 25 precincts in Hancock County but these were running heavily in favor of reapportionment by a margin of 499 votes to 70.

Under the reapportionment plan, which apparently had a sufficiently favorable margin for state-wide ratification, Harrison County will get six representatives and one senator; Jackson County will get three representatives and one senator; Hancock County will get one representative and will share a senator with Pearl River County; and Stone County will get one representative and will share a senator with Perry, Greene and Wayne counties.

## WINS BETTY CROCKER AWARD AT ST. JOSEPH'S

Virgie Benigno, daughter of Mr. and Mrs. Anthony Benigno, was recipient of the 1963 Betty Crocker Homemaker of Tomorrow award, at St. Joseph Academy.

Having achieved the highest score in a knowledge and attitude test given senior girls December 4, she is eligible, along with other winners in other state high schools, for the title of state homemaker of Tomorrow.

Local and state winners are selected on the basis of a test prepared and scored by Science Research Associates, Chicago. Personal observation and interviews are added factors in determining national winners.

The 1963 Betty Crocker Search reached another all-time high in enrollment, with 410,163 girls in 12,964 schools participating. In the program's nine years, nearly three million girls have been enrolled.

The 50-minute examination given December 4, consisted of 100 multiple choice questions and one essay question. The Search program, sponsored by General Mills, Inc., is designed to enhance the dignity and prestige of the American home; stimulate interest in the art of homemaking; and help emphasize the outstanding contributions to the home being made by high school teachers throughout the United States.

State-level judging is now going on, and the State Homemaker of Tomorrow will be named soon.

Miss Benigno is an outstanding student in Mrs. Raymond Schindler's Home Economic class at St. Joseph's.

## CAR RAMS FRONT OF UNION STREET HOUSE

Property damage and minor injury were suffered in a one-car traffic accident Saturday night.

Deputy Sheriff Gerard Kresman reported Anthony Gilbert ran into a house belonging to St. Stanislaus located at the corner of Union and Second Street when his car skidded.

Freeman estimated damage to the house at approximately \$1,000 and the 1950 Ford as a total loss.

Gilbert, he said, was in Judge Nellie Adams' court with reckless driving.

## 1962 WOOL PAYMENTS APPLY TO SALES BEFORE APRIL

Wool growers were reminded today that the 1962 program payments, to be made this summer, will be made on wool and unshorn lambs which are marketed before March 31, 1963. That is the closing date for the 1962 program.

John W. Haynes, Office Manager of the Hancock Agricultural Stabilization and Conservation County Office, also pointed out that applications for such payments under the 1962 wool program are to be filed before the end of April 1963.

He emphasized that the information on payment applications is to be supported by adequate records on the sales. For instance, producers' sales records for shorn wool should show name and address of buyer, date of sale, name and address of producer, net weight of wool sold, and net proceeds to producer after normal marketing deductions.

Payments to producers for the 1962 marketing year will follow the same methods employed for previous years. Shorn wool payments will equal to a percentage of each producer's cash returns from wool sales. The percentage, to be announced later this year, will be that required to raise the national average price received by all producers for shorn wool during the marketing year up to the incentive price of 62 cents per pound.

Lamb payments will be made to each producer who sells lambs that have never been shorn. The payments will be at a rate per hundred weight of live animals marketed to compensate for the wool on them on a basis comparable to the incentive payment per pound of shorn wool.

Mr. Haynes reminded growers that the 1963 marketing year will be a 9-month one - extending from April 1 of this year through December 31, 1963. After 1963 the marketing year will be a 12 month calendar-year basis, in line with recommendations by producers. Payments for 1963 and later marketing years, therefore, will be made beginning in April following the close of the year rather than beginning in July, as for 1962 and previous years.

## What They Wore... by PHYLLIS JOYCE

THE COURT OF VERSAILLES, CENTER OF MOST EUROPEAN SOCIAL LIFE BEFORE THE FRENCH REVOLUTION, WAS A CONSTANT FASHION PAGEANT.

YOUNG QUEEN MARIE ANTOINETTE WAS THE STAR AND HER CLOTHES WERE COPIED THROUGHOUT THE WORLD. HER DRESSES TOOK MANY MONTHS TO MAKE BECAUSE OF ALL THE INTRICATE ORNAMENTATION.

ALTHOUGH COURT COSTUMES WERE REGULATED BY STRICT RULES OF DECENCY, FASHION WAS FREELY ALLOWED TO SHOW IN SUPERB DRESS.

THE FASHION OF THE DAY WAS A Mixture of the old and the new. The French Revolution was a constant fashion pageant.

## March of Dimes Pioneer Plan To Improve Child Medical Care

Top-quality medical care, though often capable of changing the whole life prospects of infants and children with crippling disorders, is unavailable to the majority of these patients.

That is why The National Foundation-March of Dimes is pioneering with a project designed to remedy this situation by financing a network of more than 50 treatment centers across the nation for birth defects, arthritis and polio.

But fully twice this number of centers is needed because of the magnitude of the problem. This urgent need is one of the chief reasons for the current March of Dimes campaign here this month.

"No other health organization in the United States, or for that matter not even the federal government, has attempted any such comprehensive network of special treatment centers," Basil O'Connor, president of The National Foundation-March of Dimes, said recently.

"We invested a great deal of study and thought in this project, before we began in 1960 with the three pilot units patterned after our polio respiratory centers," he added. "But even with all this planning and preparation—which included medical conferences across the country—we did not foresee the full magnitude nor the urgency of the needs that these special treatment centers very soon brought to light."

Some Headway Made  
"The thoughtful and compassionate generosity of the American public has permitted the March of Dimes to make some headway in meeting the medical and medical-care problems posed by 250,000 infants born each year in our country with major birth defects; and the 42,000 children and adolescents crippled by some form of arthritis or rheumatic disease."

These treatment centers for birth defects, arthritis and polio, whose costs are borne directly by about 500 March of Dimes chapters as well as national headquarters, are affiliated with more than one-half

March of Dimes-financed treatment centers in great medical institutions like these care for hundreds of afflicted children.

of the medical schools in the United States. They are located from the Atlantic to the Pacific, from the Canadian to the Mexican borders.

"Health Teams" Used  
Each provides continuous and comprehensive care for inpatients or outpatients by specialist members of "health teams." In the case of birth defects, this would often mean a pediatrician, a pediatric neurosurgeon, urologist, orthopedist, physical therapist, medical social worker, psychologist or psychiatrist, and others. Similarly, all of the special medical and other skills needed for the research study and the treatment of arthritis are enlisted in the "health teams" at the arthritis centers sponsored by the March of Dimes.

The March of Dimes-financed centers are the setting sometimes for family dramas where emotions range from despair to jubilation. More than once have parents given up hope for their child, only to find that early treatment has made it possible for their youngster to escape serious disability or death. It is so often a matter of prompt action and expert treatment that makes the difference.

In a review of the progress in scarcely two years of these special treatment centers, Dr. William S. Clark, director of the medical department of The National Foundation-March of Dimes, reported:

"What we have been achieving through our centers may seem breathtaking and miraculous to some people. But the underlying principle involved here is really very simple. It has been the guiding principle of the research study and the treatment of arthritis throughout its first quarter century, the anniversary of which we observe this month. It is this:

"Do something to prove that the best care can be brought out of our great medical centers and hospitals to America's doorstep in every town and village, and the American public, seeing that it can be done, will demand that it must be done. That's the March of Dimes in a nutshell."

### CELEBRATES 17TH BIRTHDAY

Dusty Rhodes, who celebrated his 17th birthday Saturday, January 26, was honored with a surprise party Sunday at the home of Mr. and Mrs. Eugene Monti with Misses Karen Creel and Barbara and Peggy Monti as hostesses for the occasion.

Celebrating with Dusty were Jim Stampley, Joan Chapman, Tommy Chapman, Allison Trellis, Ken Monti, Harold Roberts, Lonnie Schultz, Henry Heitzmann, Marie Ladner, Vic Green, Danny Lacour, Vic Jorda, James Ferry, Jeanie Martinovich, Butch Smith, Henry Kothmann and Gary Ladner.

### MISSISSIPPI'S INDUSTRIAL DEVELOPMENT HAD A GOOD YEAR IN 1962

The big industrial news in Mississippi in 1962 was the fast step-up of a trend toward heavier industry - bringing higher than ever wages to the state's industrial workers. And the number of people engaged in manufacturing work hit a new peak in Mississippi during 1962. The 130,000 Mississippians listed in manufacturing jobs was an all-time high. The 84 new industries created an estimated 7,664 new jobs, and the 69 expansions made possible an additional 3,502 new jobs, for a "New Job" total of 11,166 for the year 1962.

It was in his capacity as chairman of the A&I Board that Governor Barnett appeared on statewide television and radio early in January to report on Mississippi's progress in 1962. He called 1960 the "Year of Beginnings," citing the 39 new industrial development laws passed by the state legislature that year and known as a Bill of Rights for Business and Industry. He referred to 1961 as the "Year of Action," recalling the location in the state of the Standard Oil refinery at Pascagoula and was the "First Year of Results."

"Every economic indicator points to the fact that Mississippi is moving forward at a record pace. And the indications are that 1963 will surpass all records in economic gains for our state," the Governor said. "Mississippi businessmen are looking forward with confidence to 1963 bolstered by the fact that the year 1962 brought a high level of activity and the decade of the 1950's produced sharp expansions in virtually all major segments of the state's economy."

### POSTMASTER BECKER ANNOUNCES SUBSTITUTE CARRIER EXAM

Postmaster Andy J. Becker announces that the competitive examination for substitute Clerk-Carrier in Bay St. Louis, Miss., post office is open for the purpose of establishing an adequate register for future needs. A copy of the announcement and application form will gladly be furnished upon request. The beginning basic rate of pay is \$2.26 per hour.

The minimum age limit is 18, however, this age limit is waived for high school graduates. They may be appointed when they reach their 16th birthday provided local child labor laws permit. There is no maximum age limit.

All interested persons can secure the necessary forms and further information from their local postmaster, the Executive Secretary, Board of U. S. Civil Service Examiners, Room 240, Post Office, Jackson, Miss., or from the Atlanta Region, U. S. Civil Service Commission, Federal Office Building, Atlanta 3, Ga. Application should be filed with the Executive Secretary, U. S. Post Office, Jackson 5, Miss.

Applications will be accepted until further notice.

Mr. and Mrs. Harry Favre and children.

### HOME AGENT'S NOTES

MARCIA P. HUGHES  
Home Demonstration Agent

Let's have a column of short household hints this week. I do hope you will find an idea or two that will help you and your family.

The squeeze test does not necessarily indicate freshness of bread. A compact loaf of bread may be quite fresh but not respond to pressure.

If you need an extra wide piece of wax paper, seal two pieces together with a hot iron.

For a breakfast menu treat, dip bread slice in a mixture of concentrated orange french toast topped with a sprinkling of cinnamon-sugar.

Water has nothing to do with "rust" on lettuce. If the lettuce is nice and fresh when you buy it and if you use it within a few days, "rust" will not be in evidence.

If you can't remember which hams need cooking and which do not, make it a habit to further cook all hams before eating. Cooking improves flavor and texture of any ham.

Some cheese ideas: sprinkle muffins with shredded cheese before baking; make cheese waffles and biscuits; hide a cube of cheddar cheese inside a hamburger patty. A creamed grape topper can be used to dress up a dessert. Just fold seeded grape halves into whipped cream.

For a change of pace, try oval ice cubes. Fill a plastic egg tray with water and put it in the freezer.

Frequent dusting reduces need for special cleaning of venetian blinds.

Most any time of the year you can buy frozen shaped rolls and cook them as economically as you can prepare your own. Brown-and-serve rolls and baked rolls cost almost twice as much as home-baked ones.

Label stains, rust or dents do not affect the contents of a can, as long as the can does not leak. Any container that leaks should be discarded.

Use an ordinary laundry sprinkler to measure liquid - shortening and water for a flaky pie crust. Use also to add these liquids to dry ingredients. The first time you use the sprinkler, add the oil and mark the level with nail polish. Then add the right amount of water and mark this. You can use the marks for measuring the oil and water each time you use the sprinkler. Shake the oil and water before adding to dry ingredients.

### NASA MICHOUD OPERATIONS LET ANOTHER CONTRACT

NEW ORLEANS, La. - A \$148,000 contract has been awarded by the NASA Michoud Operations for phase three modification of the plant cooling water system at the New Orleans installation.

The 90-day contract was let to S. I. P., Inc., Houston, Texas, by the Operations' support services contractor, Mason-Rust.

The project calls for installation of a cooling tower, basin, sump, pumps, piping and related items necessary for a complete cooling water system.

### MARSHALL SPACE CENTER

NEW ORLEANS, La. - The NASA Marshall Space Flight Center's large Palaemon, carrying a full-scale engineering mock-up of a Saturn S-1 booster, was scheduled to leave Huntsville, Ala., today enroute to New Orleans.

The mock-up of major sections of the Saturn C-1 (Block II) first stage is being shipped to Marshall's Michoud Operations here it will be used for orientation and training of personnel by the Chrysler Corporation Space Division, NASA's prime contractor for C-1 booster production.

The Palaemon will be in regular commercial tow. The trip will take about two weeks.

The Saturn mock-up was constructed at Marshall to help engineers in the assembly of Saturn Block II (operational) vehicles.

NEW ORLEANS, La. - A \$45,730 contract has been awarded to Boley and Hardouin Construction Company Inc., of New Orleans for the renovation of Boeing Co. offices at the NASA Michoud Operations.

The 75-day contract was let by Mason-Rust, Michoud support services contractor.

Work under the contract will consist of erecting new partitions installing vinyl asbestos floor tile, painting, carpeting and modifications to existing electrical, mechanical and plumbing installations.

Boeing will develop and manufacture the first stage of the Saturn C-5 manned lunar landing space vehicle at Michoud.

There's something about the flavor of good butter that is a secret only Nature knows.

### FORTY SCHOLARSHIPS AVAILABLE AT OLE MISS.

UNIVERSITY, Miss. - Forty University of Mississippi Summer Session scholarships are now available to high school seniors and junior college students who wish to participate in the 1963 Ole Miss Summer Music-Theatre Workshop, according to Dr. John E. Phay, Provost for the Summer Session.

There are twenty scholarships of \$120.00 each available in both Music and Theatre. According to Dr. Phay, scholarships will be awarded on the basis of detailed evidence of ability to perform in either of the fields and potential to be a university student of high ability.

Dr. Charles M. Getchell of the Department of Speech and Theatre will be in charge of the theatre wing of the workshop, and Dr. Mark Hoffman of the Department of Music will direct the musical activities.

Although a student may be selected to work primarily in either music or theatre, he will have the opportunity of working in both areas if he so chooses.

The two divisions of the workshop will present plays, concerts, chamber music and other public performances separately as well as producing a large joint effort in the form of a musical comedy. This joint production is scheduled to go on tour during the summer to Jackson, Vicksburg and Meridian.

Students interested in participating in the Workshop should contact their high school or junior college music or speech teacher for application forms. Application forms can also be obtained by writing directly to Dr. Franklin E. Moak, Director of Placement and Financial Aids, University of Mississippi, University, Mississippi.

The deadline for applications is April 5. Awards will be made within two weeks after that date.

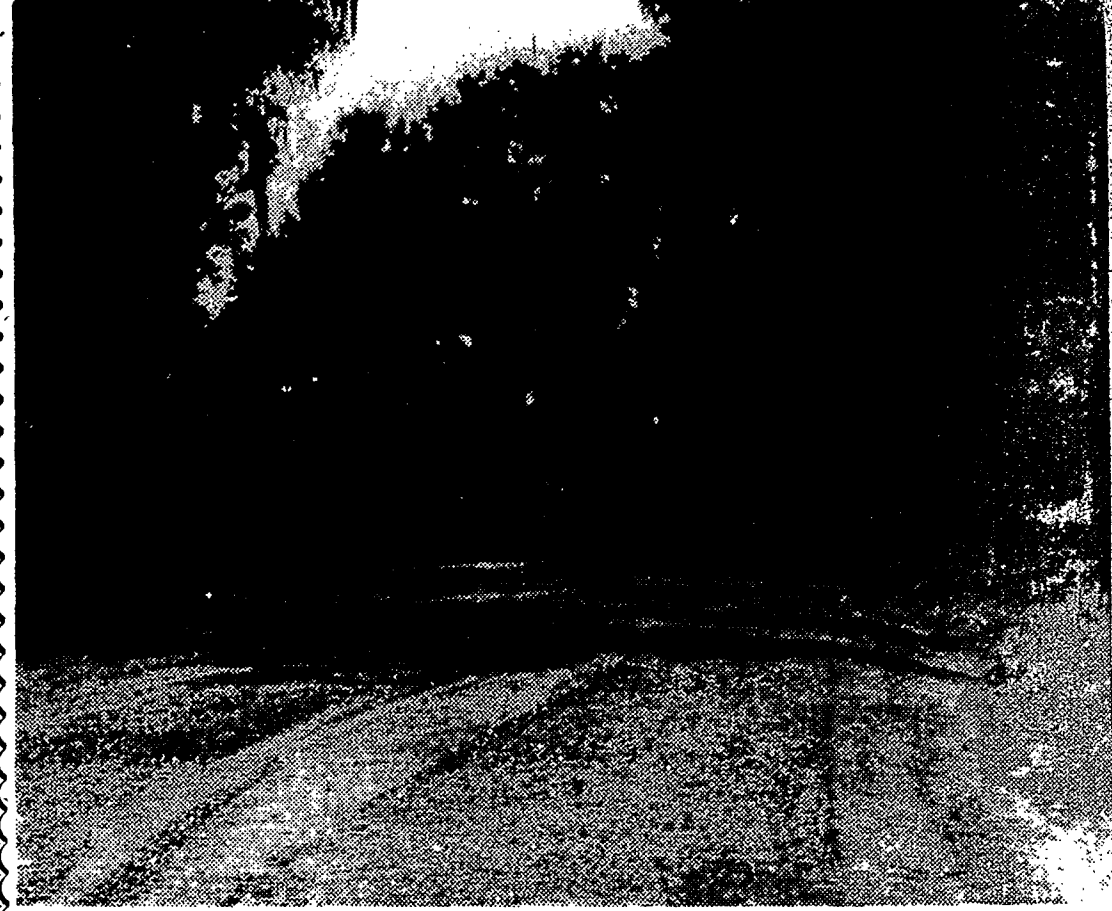

Acceptance of the scholarships by applicants must be in by April 30 along with application for admittance to the University.

### WEATHER SUMMARY

Prolonged very cold weather over the state for the week ending January 26, 1963, brought all farming activity to a standstill, except for the feeding of livestock and necessary farm chores. Temperatures over the entire state were too cold relative to crops and livestock. Soil moisture ranged from short to surplus, but mostly adequate. The southern districts of the state reported generally adequate to short. An inadequate supply of soil moisture has hindered fall and winter crops. The corresponding week a year ago temperatures were below normal and soil moisture was excessive to surplus.

One hundred pounds of 4% milk will yield approximately 10 pounds of cheese and 90 pounds of whey, or 13 pounds dried whole milk and 1 1/4 pounds of cream, or 5 pounds of butter and 95 pounds of skim milk.

## A do-it-yourself retirement plan that really works

Just a few pennies a day invested now in U.S. Savings Bonds can help you build security for the future.

Here's a retirement plan you can set up yourself, administer yourself with no fees or expenses, and go into with absolute confidence.

### Start with Series E Bonds

You begin by buying E Bonds where you bank, or automatically on the Payroll Savings Plan where you work. When you hold them for 17 years, 9 months, you get almost double your money back—\$1.93 for every \$1 invested.

When you retire, you can exchange your E Bonds for H Bonds. H Bonds pay interest to you semi-annually in cash—at 3.75% when held to maturity. There's no charge for trading. And the interest you accumulated before the trade is not taxable until you cash in your H Bonds.

### A riskless plan

A U.S. Savings Bonds retirement plan is completely without risk. Your money keeps on growing, guaranteed by the Government. You can get it anytime you want—with interest. And if your Bonds are ever lost or destroyed, the Treasury replaces them free.

Why not look into this plan today?

### THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Our neighbor has a firm opinion about children and pets: "When a boy is old enough to assume responsibility for the care of a dog, it's time enough for him to have one."

But our Davey is growing up with his dog — his frolicking playmate today, his faithful friend and protector tomorrow.

Our neighbor has an opinion also about children and God: "When my son is able to weigh the claims of religion with a mature mind he can decide for himself whether he wants to go to Church."

What heritage would men have of Truth and Right and Freedom if each generation had not imparted its blessings to the next? It is the faith of our fathers which is ours to cherish, and to teach our children.

Let them grow up with that Christian Faith and it will have its rightful place in their lives.

## Social Security

families employing household employees working by the day, the week, or throughout the year, may now be doing them: an increase by failing to report their earnings for social security purposes. Jerome H. Drane, district manager of the Gulfport office, said today.

any cleaning woman, maid, cook, or any other person who works for as much as \$50 every month should have his or her earnings reported and the social security taxes paid.

a maid comes to your house to clean or laundry as infrequently as one day a week and is paid as little as \$3.85 for her work, her earnings must be reported if she continues to work each week in the calendar year and earns \$50 or more.

the law has been on the books since 1951, but it is estimated that there are still many, many households employing domestic servants part or full-time who are failing to comply. The householders usually do not learn of the application to him until his employer makes a claim for social security benefits, Mr. Drane said.

many cases, the employer may be faced with a staggering bill for taxes, interest and penalties, only for the employer contributions to social security but for employee's share of contributions as well.

Mr. Drane urged all employers to pay domestic \$50 cash wages quarterly or more to get in touch with the Internal Revenue Service without delay. Booklet No. 21, available at the social security office in Gulfport, contains a pre-addressed post card for this purpose. The Social Security office in Gulfport is located at 1022 32nd Avenue.

### GULF PINES GIRL SCOUT COUNCIL MOVES

Mrs. Leonard Stocker, Council President, announced today that the Gulf Pines Girl Scout Council will move its office on January 26th from the Rebel Building to the new Southern Building - Suite 216 - Hardy Street - Hattiesburg, Mississippi.

The Southern Building has just been completed by Ford and L. B. Vance and is modern in every detail. It is located at the intersection of Broad and Hardy Street.

The Girl Scout Council and its staff believes the move will result in better service due to the central location of the new office, the ample parking facilities, bus line at the door, and direct access to the major highways. All camping and program supplies will be stored at the new office which will be a distinct advantage to troop leaders. Included in the suite is a room to be used for conference and committee meetings.

Girl Scouts and Brownies in Hancock County are under the jurisdiction of the Gulf Pines Council.

### Kantcha Ketchum

Cold weather continued over the last week and winds were exceptionally high Saturday and Sunday. Small craft had to stay close to shore and very little fishing was done.

A few green trout were caught up the bayous where good water was found.

August and Nicky Rauxet caught some nice green trout Saturday afternoon before the blow that night.

Some speckles were caught again in the Pass Christian Harbor but not too many to brag about.

Emmett Stanley was over from New Orleans this past weekend. He loves his fishing and was telling us where to catch 'em in Louisiana. He is strictly a salt water fisherman and gets his share of reds and speckles.

We will be waiting to go with you.

Ellis St. Amant a newcomer to our mid says he enjoys any kind of fishing. He says he is way behind on his fishing but expects to catch up as soon as the weather gets normal.

Another busy man is Tommy Egloff. Tommy says this winter weather has kept him pretty much on the job serving customers with gas to keep them warm. He says he will be after the fish when the chance comes. He is a good fly fisherman, too.

A congenial couple is Mr. and Mrs. Felton Craft who operates the Surplus Discount Store here. Mr. Craft has always been a hunter and fisherman and knows fishermen's needs. We'll get around to some fishing soon Mr. Craft.

E. R. Holbrook is honest, he doesn't like to fish but loves to eat them. Maybe we can get around to you sometime, E. R.

Perre Quintini was back to fishing after a little layoff. Perre got a mess of green trout Saturday.

Now that fishing is coming into its own it's good to know hand grabbing for catfish and non-game gross fish is closed in both Hancock and Pearl River counties.

A Layman's Dinner was held at the Parish House of Christ Episcopal Church Thursday night. Hosts were Messrs. N. L. Carter, W. D. Kellogg, James Robert, Rene deMontuzin, T. J. Garner, and R. A. Steinmayer. Besides a wonderful

### CLIMATE

All hunting seasons for this year closed on Thursday, February 14th.

Local sportsmen will turn their attention to fishing from now on. In previous years it has proved that after a severe winter, fishing is good during the summer months. Better plan to go fishing. It does something to you.

A good daily milk intake will supply as much as 40% of a person's daily over-all food needs.
